-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, drawn to an earth working scraper, classified in class 172, subclass 677.
- II. Claims 36-39, drawn to an earth scraper, classified in class 172, subclass 684.5.
- III. Claim 40, drawn to a method of earth scraping, classified in class 172, subclass 001.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (Invention II) as claimed does not require the particulars of the subcombination (Invention I) as claimed because the combination (Invention II) does not require a hitch, bogie wheel, spindle hub or piston. The subcombination (Invention I) has separate utility such as in situations not requiring a limiter.

Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process

Art Unit: 3671

(Invention III) as claimed can be practiced by another materially different apparatus that does not require the axle to be rotatable. It is to be noted that the process (Invention III) requires a rotatable axle **wheel** but does not require the **axle** itself to be rotatable. The apparatus (Invention I) requires the axle to be rotatable.

Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process (Invention III) as claimed can be practiced by another materially different apparatus that does not require the axle to be rotatable. It is to be noted that the process (Invention III) requires a rotatable axle **wheel** but does not require the **axle** itself to be rotatable. The apparatus (Invention II) requires the axle to be rotatable.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
